YAAD KAMRUL BARI

Bashundhara R/A, Dhaka, Bangladesh 01581700387
yaadbari21@gmail.com Yaad Bari Yaad Bari

CAREER OBJECTIVE

Computer Science graduate (CGPA 3.96/4.0, BRAC University) with hands-on experience in agentic AI, computer vision, and robotics. Led the AI and Machine Vision sub-team at BRACU Duburi, Bangladesh's first autonomous underwater vehicle, taking the perception pipeline from data curation to TensorRT deployment on a Jetson within a ROS2 stack. Builds LLM agents, multi-agent systems, and RAG applications with LangGraph, FastAPI, and PostgreSQL/pgvector. Seeking to join research-driven teams building reliable AI and autonomous systems for real-world, resource-constrained environments.

EXPERIENCE

Research Assistant **May 2026 – Present**
Dubotech Digital Ltd. *Dhaka, Bangladesh*

- Contribute to ongoing research and development projects on underwater robotic systems, supporting design, implementation, and testing across the vehicle stack.

Sub-Team Lead, AI and Machine Vision **April 2026 – July 2026**
BRACU Duburi, The First Autonomous Underwater Vehicle of Bangladesh *Dhaka, Bangladesh*

- Lead end-to-end ML pipeline for underwater object detection and tracking using YOLO and tracking algorithms, covering dataset curation, annotation, training, and deployment.
- Contributed to the team's 8th-place finish among 58 international teams at RoboSub 2026.

Undergraduate Teaching Assistant **February 2025 – May 2026**
Department of Computer Science and Engineering, BRAC University *Dhaka, Bangladesh*

- Conducted 15 hours of weekly consultation, supporting students with coursework concepts and problem-solving.
- Guided students through core algorithmic concepts, including algorithm design and analysis.

EDUCATION

BRAC University **September 2022 – June 2026**
Bachelor of Science in Computer Science, CGPA: 3.96/4.0 *Dhaka, Bangladesh*

Notre Dame College **July 2019 – December 2021**
Higher Secondary Certificate 2021, GPA: 5.0 *Dhaka, Bangladesh*

Dhaka Residential Model College **January 2011 – March 2019**
Secondary School Certificate 2019, GPA: 5.0 *Dhaka, Bangladesh*

PROJECTS

Agentic AUV: Fault-Tolerant Multi-Agent AI for an Autonomous Underwater Vehicle | *LangGraph, VLM*

- Multi-agent LLM system that plans underwater missions from plain English with tool calling and AI guardrails.
- Uses a VLM for scene understanding and multimodal sensor fusion (EKF, sonar) to keep working through sensor faults.

BRACU Duburi – AUV Vision Pipeline | *YOLO11, PyTorch, TensorRT, ROS2, Jetson*

- Built the computer vision pipeline for Bangladesh's first AUV, from annotation to YOLO11 training (0.995 mAP50).
- Pruned the model and deployed it with TensorRT on a Jetson Orin Nano for real-time detection and ByteTrack tracking.

AUV LLM Mission Planner: Agentic AI for Autonomous Underwater Vehicles | *LLM Agents, Ollama, ROS2*

- LLM agent that turns plain-English commands into robot missions using tool calling and structured outputs.
- AI guardrails validate every plan and the agent re-plans on failure, evaluated on 25 missions in Gazebo.

bari: AI Housing Assistant for Students in Dhaka | *LangGraph, RAG, FastAPI, React, PostgreSQL/pgvector*

- Agentic AI assistant for finding safe housing in English and Bangla, using RAG, hybrid vector search and re-ranking.
- LangGraph background agent with human-in-the-loop approval; guardrails blocked 100% of prompt-injection attacks.

Pinstagram | *FastAPI, React Native, Next.js, PostGIS, pgvector*

- Instagram-style app for discovering places in Bangladesh, with a map, reviews, and bus and ride-hail directions.
- Added semantic search, RAG review summaries and an AI trip agent; async FastAPI backend with 163 integration tests.

BRACU Duburi Vision Pipeline Dashboard | *Streamlit, Plotly, n8n*

- Built a dashboard for the Duburi team to review training results (loss, confusion matrices, predictions) per task.
- Automated workflows that send video clips to annotators and collect their labels.

MindWell – AI-Powered Employee Wellness Platform | *FastAPI, React, PostgreSQL*

- Wellness platform where companies invite staff, employees complete periodic check-ins with email reminders, and admins monitor through role-based dashboards.
- Built the FastAPI backend with JWT authentication.

Weather-Robust Object Detection Using GANs | *PyTorch, Pix2Pix, YOLOv5*

- Developed a weather-aware object detection system for autonomous vehicles, using Pix2Pix GAN to generate synthetic adverse weather scenarios (snow, rain, fog).
- Trained YOLOv5 on the generated data for real-time detection that stays reliable in extreme weather.

AWARDS

International Competitions

- **8th Place, RoboSub 2026, RoboNation, Woollett Aquatics Center, California** – Secured 8th place overall among 58 international teams, contributing as Sub-Team Lead of AI and Machine Vision.
- **8th Place, RoboSub 2025, RoboNation, Woollett Aquatics Center, California** – Secured 8th place overall among 58 international teams, contributing as Technical Coordinator.

National Competitions

- **2nd Runner Up, National Telco Warfare Datathon 2024, East West University** – Achieved 2nd Runner Up in a national-level ML and DL competition, developing a VGG19-based image classification model with ∼90% accuracy.

TECHNICAL SKILLS

Programming: Python, C, C++, Java

AI & LLMs: Agentic AI, LLM Agents, Multi-Agent Systems, RAG, LangGraph, Tool Calling, VLMs, LLM Evaluation

Machine Learning: PyTorch, TensorFlow, OpenCV, YOLO, NumPy, Pandas, Matplotlib, Seaborn

Robotics: ROS2, Gazebo, MuJoCo, Pixhawk, Sensor Fusion, Kalman Filters

Backend & Databases: FastAPI, SQLAlchemy, REST APIs, PostgreSQL, PostGIS, pgvector, MySQL, Redis

Frontend: React, React Native, Next.js

Edge AI: Jetson Nano/Orin Nano, TensorRT, ONNX, Model Pruning, Edge Deployment

Tools: Docker, Git, GitHub Actions, pytest, Ollama

Soft Skills: Problem-Solving, Communication, Adaptability, Time Management, Integrity
